Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

The papers filed on February 27, 2002 (certificate of mailing dated February 11, 2002) have not been made part of the permanent records of the United States Patent and Trademark Office (Office) for this application (37 CFR 1.52(a)) because of damage from the United States Postal Service irradiation process. The above-identified papers, however, were not so damaged as to preclude the USPTO from making a legible copy of such papers. Therefore, the Office has made a copy of these papers, substituted them for the originals in the file, and stamped that copy:

**COPY OF PAPERS
ORIGINALLY FILED**

If applicant wants to review the accuracy of the Office's copy of such papers, applicant may either inspect the application (37 CFR 1.14(d)) or may request a copy of the Office's records of such papers (*i.e.*, a copy of the copy made by the Office) from the Office of Public Records for the fee specified in 37 CFR 1.19(b)(4). Please do **not** call the Technology Center's Customer Service Center to inquiry about the completeness or accuracy of Office's copy of the above-identified papers, as the Technology Center's Customer Service Center will **not** be able to provide this service.

If applicant does not consider the Office's copy of such papers to be accurate, applicant must provide a copy of the above-identified papers (except for any U.S. or foreign patent documents submitted with the above-identified papers) with a statement that such copy is a complete and accurate copy of the originally submitted documents. If applicant provides such a copy of the above-identified papers and statement within **THREE MONTHS** of the mail date of this Office action, the Office will add the original mailroom date and use the copy provided by applicant as the permanent Office record of the above-identified papers in place of the copy made by the Office. Otherwise, the Office's copy will be used as the permanent Office record of the above-identified papers (*i.e.*, the Office will use the copy of the above-identified papers made by the Office for examination and all other purposes). This three-month period is not extendable.

1. Claims 1-23 are currently pending.

Election/Restrictions

2. Applicant's election with traverse of Group V, claims 11 and 14-23 and phenolic acid, specifically cinnamic acid for species D in Paper No. 5 is acknowledged. The traversal is on the

Art Unit: 1651

ground(s) that a search of group V would be “overlapping and coextensive” with a search of Groups VI and VII; thus, the search could be made without undue burden. This is not found persuasive because while a search of all of these groups would overlap to some extent, it would not necessarily be coextensive because each group does not necessarily require ingredients that are present in the other groups.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 1-10, 12, 13, and 15-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

4. Claims 11, 14, and 21-23 are examined on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Marwan et al. (J. Food Sci. (1982), vol. 47, no. 3, pp. 774-778).

The claim is drawn to a phenolic compound isolated from cranberry.

Marwan teaches phenolic compounds that can be isolated from cranberry. Marwan shows cinnamic acids from cranberries that are complexed with glucose (see page 778).

Art Unit: 1651

6. Claims 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Merck Index (Budavari et al., eds. (1989). Merck and Co., Inc.: New Jersey, pp. 358, entry 2300).

These claims are drawn to cinnamic acid isolated from cranberry.

The Merck Index teaches that cinnamic acid is a known compound. It does not specifically teach that the compound can be isolated from cranberry. However, the original source of a known compound is not considered to alter the compound itself.

7. Claims 11, 14, and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Camire et al. (J. Food Prot. (1980), vol. 43, no. 1, pp.36-37).

The claims are drawn to a composition of cinnamic acid in the form of a pharmaceutical composition, a dietary supplement, or a foodstuff.

Camire teaches adding cinnamic acid to cranberry juice. Drinking cinnamic acid in juice is considered encompass the administration forms claimed by applicant.

8. No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan Coe whose telephone number is (703) 306-5823. The examiner can normally be reached on Monday to Thursday from 8:00 to 5:30 and on alternating Fridays.
